

Introducing the MitsWeb Dashboard

Imbedded Browser-Enabled Terminal Emulator such as Wntegrate or Accuterm stays active

Quickly switch from one Dashboard to another

Conditional Alerts can switch images to show the state of Key Metrics. Green = Acceptable Range Red = Attention Required

Dashboards are groups of Dashboard "objects" organized by user or department

Clicking on Dashboard Chart triggers MITS OLAP Flash Screen showing Key Metrics used to create chart

Key Metrics would be updated during the day when MITS Hypercubes are configured for Continuous Update

Dashboard Links trigger MITS OLAP analysis. User can begin to explore the underlying details

Built-in Dashboard Organizer lets user customize the dashboard layout

Branch	Product Line	2002	2003	2004	2005	2006	2007	2008	2009
