

What We Provide

Technical Resource Group (TRG) is a leading provider of Information Technology (IT) expert resources to clients with SAP for projects of all sizes and difficulties. Projects range from complex e-business and web development initiatives to integration with non-SAP software packages. We provide these resources on a contract basis. We create tremendous value for our clients through our unique combination of resident expertise, excellent recruiting practices, our toolset and our project management capability.

Expertise & Focus Areas

We provide resources in the following areas as our consultants have expertise in the following:

- Application Software Development
- Internet/Intranet Development
- Project Management
- Migrations/Conversions, Integrations

TRG & our consultants focus on the following areas:

- EAM & PLM Modules
- Integration
- Web
- Staff (Resource) Augmentation

Why TRG for Resources

The benefit of using TRG to provide you with the IT resources you require is as follows:

- Our quick response to your resource request
- Our multi-discipline technical screening by our full-time employees
- We are an IT expert company and NOT a Staffing Company – we understand the business processes you need to automate and the technologies that enable them!
- We deliver the right resources right at the time you need them – On Demand
- We have excellent Project/Resource Management & stay involved in the project
- We have resident expertise in many facets of IT
- Reasonable cost of highly qualified IT professionals

Our Consultants

- Are team-oriented professionals who will strive to deliver the best business solution
- Possess skills in requirements gathering, analysis, specification writing, coding/testing, support, and report writing as well as have great communication skills
- Retain functional skills in SAP modules including: PLM & EAM
- Maintain diverse technology backgrounds such as IBM, Oracle, .Net, JAVA, J2EE
- Listen to our clients' requirements before determining the best course of action
- Have a breadth of industry knowledge in commercial and public sector industries
- Have access to our own tool set of open sourced tools that allows them rapid development of integration and web software

Our Mission & Focus

Our mission is to help major clients make their business processes more effective by providing the necessary SAP resources that can improve their SAP application as well as the integration between SAP and other critical applications.

We are focused on providing high quality IT resources to organizations using SAP software and specializing in the integration of SAP with other applications. Making SAP connectivity simpler, quicker and more effective is a prime focus of our business. We focus on effective integration between core business systems as we know that this requires expert resources.

Our Background/History

TRG, a Pipeline Group Company, has been providing IT-related services since 1995 and has been providing SAP related services/resources since 2001. In 2006 we became a part of the Pipeline Group and experts in integration of SAP to non-SAP applications
